

ENVIRONMENTAL POLICY

IRF will strive to bequeath coming generations a better more sustainable Faroe Islands. The purpose of IRF is to collect and treat waste and waste water in a way that is right for the environment in order to prevent pollution, as well as to ensure that the resources in waste are kept in circulation.

It is also IRF's duty to comply with existing agreements, future legislation and regulation in the environmental area, and to play an active role when new legislation and regulations governing environmental protection in the Faroe Islands are drafted.

Through innovation and passion IRF will lead the way in the waste sector to make the Faroe Islands greener.

IRF's Environmental Policy is based on the 17 UN Sustainable Development Goals. This Environmental Policy sets out the company's direction in its efforts to make the Faroe Islands cleaner and more sustainable.

IRF's Environmental Policy consists of 4 environmental goals:

1. Responsible Consumption and Production

IRF will ensure that all of its consumption and production is responsible and sustainable. Moreover, it is one of the company's foremost tasks to raise awareness of and encourage the prevention, reuse and recycling of waste in the Faroe Islands.

2. Clean Oceans

IRF will strive to ensure that no waste or other harmful substances are dumped in the ocean.

3. Green and Sensible Energy Use

IRF's will ensure that its energy use is green and sensible, and that IRF's energy production is fully harnessed.

4. One of the Best Workplaces in the Faroe Islands

IRF will strive to be a workplace where the employees thrive and where consideration is shown for each individual colleague's resources. Furthermore, IRF will be an active and coordinating partner in the public forum and the environmental area in general.
